

# BIOCATALYSIS

# BIOCATALYSIS

Biocatalysis is a high quality journal designed to have impact on the scientific, academic and industrial sectors. Researchers, working in the field of biochemical catalysis for environmental, health and energy applications can share results of their work. New approaches such as genomics, proteomics and molecular engineering are welcome as well. The journal includes frontier research tools such as computational chemistry and bionanotechnology. Biocatalysis aims to be the main option to publish relevant scientific and technological findings in all subjects on biochemical transformations.

## SCOPE

Submissions on the following fields are strongly encouraged:

- ▶ Bionanotechnology,
- ▶ Computational chemistry focused on enzymatic reactions,
- ▶ Biosensors and enzymatic fuel cells,
- ▶ Green chemistry,
- ▶ Biocatalytic processes for biofuels and pharmaceuticals,
- ▶ Emerging biomaterials,
- ▶ New approaches in genomics, proteomics and molecular engineering,
- ▶ New biocatalytic activities and biocatalysis in non-conventional and extreme media

## HOW TO SUBMIT:

## EDITORIAL ADVISORY BOARD

### Spiros Agathos

Universite Catholique de Louvain, Belgium

### Miguel Alcalde

Institute of Catalysis and Petrochemistry (CSIC), Spain

### Riccardo Basosi

Universita di Siena, Italy

### Patrick C. Cirino

University of Houston, USA

### Richard A. Gross

Rensselaer Polytechnic Institute (RPI), USA

### Stefan Lutz

Emory University, USA

### Tomoko Matsuda

Institute of Technology, Japan

### Burckhard Seelig

University of Minnesota, USA

### Rein V. Uljijn

City University of New York, USA

### Huimin Zhao

University of Illinois at Urbana-Champaign, USA
